2030 COMMITMENTS

WE ARE COMMITTED AND SUPPORT A MORE RESILIENT, SUSTAINABLE AND COMPETITIVE AGRICULTURAL SECTOR.

Our sector invests in chemical, biological and digital solutions, and supports a simplification agenda that improves predictability and enables innovation to reach Europe's farmers.

INNOVATION & INVESTMENT

We are investing to accelerate farmers' abilities to fight pests, weeds and diseases while protecting the environment

By supporting the deployment of digital tools and biopesticides, we contribute the European Commission's ambition of a digital and green recovery.

CIRCULAR ECONOMY

We are continuing to address the plastics waste challenge

By increasing the collection and recycling of the plastic containers in which pesticides and bio-pesticides are packaged, we contribute to the EU's goal of a circular economy.

PROTECTING PEOPLE & THE ENVIRONMENT

We are providing access to training on new technologies and best management practices on how to responsibly use our products

By training farmers on the implementation of Integrated Pest Management, water protection, the importance of personal protective equipment our sector aims to further minimise exposure and reduce risk of pesticide use.

OUR SIX COMMITMENTS

1 **Invest 10 billion euros into innovation**
in precision and digital technologies by 2030.

2 **Invest 4 billion euros into innovation**
in biopesticides by 2030.

3 **Establish an average 75% collection rate**
of plastic pesticide and biopesticide containers across EU Member States by 2025.

4 **Ensure that a container scheme is available in all EU Member States by 2025,**
expanding the programme in two additional Member States each year.

5 **By 2030, train 1 million advisors and farmers on best management practices**
for farmer health protection as well as for water and the environment.

6 **Make Closed Transfer Systems (CTS) technologies available to 100% of European farmers and operators by 2030**
to further reduce operators' exposure.

2030 COMMITMENTS
WHERE WE ARE

INNOVATION & INVESTMENT

In the past 10 years, our sector invested in

DPA Technologies

€4.6 BN

46 %

OF OUR GOAL

73 %

€2.9 BN

Biopesticides

CIRCULAR ECONOMY

With a

71 %

COLLECTION RATE

already achieved in 2025 and collection schemes operating in

24 MEMBER STATES,

CropLife Europe has effectively delivered near-target performance across both key indicators

75 %

COLLECTION RATE BY 2025

PROTECTING PEOPLE & THE ENVIRONMENT

By now our network has reached out to and provided training to over

1.1 MILLION farmers

This means we have surpassed the target

5 YEARS EARLIER

while

22.22 %

OF OUR GOAL

of our containers are compatible with **Closed Transfer Systems**
